Application No. 09/515,575

Examiner: Pedro Kanof

ATTN: Draft 1, pg 1/1, for discussion purposes only.

IN THE CLAIMS

Please amend the claims as follows:

1. (Previously Amended) A method of harvesting feedback pertaining to transactions facilitated by a network-based transaction facility, the method including:

identifying a plurality of transactions associated with a first user, the plurality of transactions comprises completed transactions in which the first user participated within a predetermined time period;

communicating user interface information to a client via a communications network, the user interface information including transaction information concerning at least first and second transactions of the plurality of transactions and specifying a single feedback interface facilitating user input of feedback information for each of the at least first and second transactions of the plurality of transactions; and

receiving the feedback information, provided by the first user through the single feedback interface, for each of at least the first and second transactions, the feedback information being received via the communications network.

2. (Original) The method of claim 1 wherein the identifying of the plurality of transactions comprises identifying completed transactions in which the first user participated.

3. (Original) The method of claim 2 including identifying the completed transactions as transactions in which the first user participated as a buyer.

IN THE CLAIMS

Please amend the claims as follows:

Application No. 09/515,575

Examiner: Pedro Kanof

ATTN: Draft 2, pg 1/1, for discussion purposes only.

1. (Previously Amended) A method of harvesting feedback pertaining to transactions facilitated by a network-based transaction facility, the method including:
 - identifying a plurality of transactions associated with a first user;
 - communicating user interface information to a client via a communications network, the user interface information including transaction information concerning at least first and second transactions of the plurality of transactions and specifying a single feedback interface facilitating user input of feedback information for each of the at least first and second transactions of the plurality of transactions; and
 - receiving the feedback information, provided by the first user through the single feedback interface, for each of at least the first and second transactions, the feedback information being received via the communications network,

wherein the user interface information define first and second feedback input fields, the first and second feedback input fields being associated with each of the first and second transactions, respectively, and to receive the feedback information for each of at least the first and second transactions.
2. (Original) The method of claim 1 wherein the identifying of the plurality of transactions comprises identifying completed transactions in which the first user participated.
